AN ADVANCED **TECHNICAL RESCUE** COURSE FOR FIREFIGHTERS

Join us for a 4-day course designed for firefighters that operate in the world of technical ROPE and CONFINED SPACE rescue. This is a great opportunity for department instructors or rescue specialists to further develop their personal skills and increase their team's capabilities.

Topics include

- Physics and theory
- Leadership and communication
- Edge transitions with a litter
- Highlines and Skate Blocks
- Artificial High Directinals
- Complex Confined Space scenarios
